Mary L. Fulghum, Associate Regional Council
United States Environmental Protection Agency
Region 5
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

Dear Mary,

On January 23, 2001 our attorney Vince Oleszkiewicz submitted to you for your review a report prepared by STS Consultants dated November 15, 2000 regarding radiation surveys at Parcels 14, 18, 19, and the Riverwalk Promenade at the Cityfront/River East property in Chicago. On March 23, 2001 you responded to this correspondence. Your response focused on the Kraft building, elevated levels on Parcel 21, and the Kraft Building.

We are in the midst of negotiating with several potential partners and financial institutions. It would be helpful if we could get a response from the EPA specifically on Parcels 18 and 19. Given that no elevated levels were indicated, we would like to know what the EPA requires now and in the future when the sites are developed. Please address the letter to myself at MCL.

I appreciate the EPA's cooperation and guidance through this process and look forward to your letter.

Sincerely,

Kevin G. Augustyn
Chief Financial Officer
